

**SMOOTH-Series Aluminum Profiles Give You Less:
Less Slots. Less Grooves.
Less Dirt. Less Germs.
Less Maintenance. And Less Headaches.**

For Less Money.

Aluminum extrusions are the ideal choice when building protective machine guards, machine frames or enclosures for any industrial environment. Unfortunately, traditional aluminum profiles are also a breeding ground for dirt, oil, grease, mold, mildew, germs and bacteria to accumulate and grow. They have up to 22 places to hide (3 exposed T-slots and 19 grooves, per length of extrusion). This makes maintenance and cleaning difficult, ongoing and very expensive. Health and safety issues are a huge concern.

How do you stop the maintenance nightmare?

Our new **SMOOTH-Series** profiles eliminate all the dirt catching grooves, and provide you only the number of T-slots required for your assembly. The **SMOOTH** surfaces wipe clean easily, without the toothbrush-scrubbing, knuckle-breaking cleaning required for exposed slots and grooves. Dirt, germs and other contaminants don't have a place to hide.

**Traditional Aluminum Extrusion
4 Slots & 16 Grooves**

**FRAME-WORLD's SMOOTH-Series
1 Slot, NO Grooves**

In stock and available for immediate delivery.

This is the only full range of truly smooth profiles in U.S. fractional sizes on the market. All models and versions are available for same-day shipment. For your convenience, **SMOOTH-Series** profiles are also available as kits, engineered sub-assemblies, or as complete turnkey solutions (machine guards, frames, enclosures, etc.).

✿ ✿ ✿ **FREE SAMPLE** ✿ ✿ ✿

See for yourself! Just hit Reply to this email, and then complete the information below for a **FREE** sample of a **SMOOTH** profile. You can also get information on how you can build a cleaner, safer, low-maintenance machine guard or frame in the future.

___ Send me a **FREE** sample of the **SMOOTH-Series** profile.

___ Tell me how to build a safer, cleaner, and sleeker-looking machine guard or frame.
